

## CJ Dental Protocol During Coronavirus (COVID-19) Outbreak

The following precautions are being taken during the time of community social distancing for Coronavirus Pandemic.

1. As patients arrive to the office they are to stay in their vehicle and call the office to check in. Once their operatory is available CJ Dental will call them back and have them come into the office and will be taken to their operatory immediately.
2. Our office will communicate with you beforehand to ask some [screening questions](#). You'll be asked those same questions again when you are in the office.
3. All CJ Dental clinical personnel will be wearing PPE as usual. In addition we will be wearing a face shield for all procedures as well as a face mask during all interactions within the office.
4. We are taking temperatures of every patient, checking O2 saturation levels, and asking travel history and health history of cough, shortness of breath, or fever in the past 14 days.
5. Every patient is rinsing with 1.5% Peroxyl for 1 min prior to each appointment to kill any virus/ bacteria in their mouth at the time of treatment.
6. High speed suction is used with any procedure that creates aerosol contamination.
7. We are disinfecting all common areas such as bathrooms, front desk counter, coffee bar between each patient.
8. All employees at CJ Dental are taking every precaution in their home-life to avoid being exposed to the virus, and we are taking employees temperatures and checking O2 saturation levels daily.
9. We have hand sanitizer that we will ask you to use when you enter the office. You will also find some in the reception area and other places in the office for you to use as needed.
10. You may see that our waiting room will no longer offer magazines, children's toys, and so forth, since those items are difficult to clean and disinfect. We do not anticipate any time spent in this area other than walking to the front desk.
11. Appointments will be managed to allow for social distancing between patients. That might mean that you're offered fewer options for scheduling your appointment.
12. We will do our best to allow greater time between patients to reduce waiting time for you, as well as to reduce the number of patients in the reception area at any one time.
13. For your safety and ours, we have installed UV lights on our HVAC systems that kills 97% of viruses and bacteria trapped by our filters. We also use Microban Sanitizer in our restrooms and door handles which provides 24-hour antibacterial and antiviral protection. Your safety is our top priority.
